

THE GLEICHEN CALL

VOLUME XXXV NO. 12

GLEICHEN, ALBERTA, WEDNESDAY JUNE 3, 1942

SUBSCRIPTION \$2.00 PER YEAR

ITEMS OF INTEREST OF THE TOWN AND DISTRICT

Mrs. R. S. Haskay is spending a few days visiting relatives in Banano.

Owing to the unfavorable weather last Friday the track meet of the different schools throughout the district at Strathmore, was postponed.

Mr. and Mrs. Rod Leggett Miss W. Leggett and Don Beattie, R.C.A.F. of Calgary, were weekend visitors to the home of Mr. and Mrs. J. E. Menard.

The town streets were graded and put in fine shape last week by Messrs. Lester and Book. Tuesday the main street was scarified and the bumps smoothed out. One can now drive "half-for-leather" over the streets without danger of being thrown through the car top.

Probably the finest garden in town just now is the one owned by Mr. and Mrs. S. E. Lester. The rhubarb they have produced this year is superior. One of the stems is three cent. It is of nice long thick stalks and of beautiful pink color. The rhubarb tastes every bit as good as looks.

It is not the site of a town, but its place to live in, and a town may prosper and yet be small. Every citizen in town should be interested in its prosperity. One of the ways to help a town is to speak well of it. It is true patriotism to stand by your own town and interests, that effect the town should affect every citizen.

Miss A. V. Milloy of Calgary moved to town Saturday and is now living in her residence she purchased when lived in Gleichen some years ago and was a teacher in the local school. Miss Milloy will be here for the summer only.

One thing very noticeable now is that everybody puts their cars in the garage at night. No doubt this is to prevent theft of tires since good tires have become a scarce commodity. It seems odd to go around town in the middle of the night and see cars parked on the street. About the only ones left out all night are those belonging to taxicabbers.

The weather was decidedly chilly most of last week and several nights frost was registered. This cold weather has held back the growth of garden and other growing things. Sunday the weather started to warm up. The effects of the rain in the early part of the week has begun to show results all over the country. Judging by appearance of the country north here fell in the Stobart area here.

L. O. Nelson of Queenstown, has enlisted in the Royal Canadian Air Force at the Calgary recruiting centre as a aero engine mechanic (W.E.T.P.). A-2 Nelson commenced his air force training at No. 3 Manning Depot, Edmonton, on May 27. Previous to enlistment Alfred Nelson had been farming at Queenstown.

Made necessary owing to transportation difficulties the new sugar rationing order of May 20 cuts down the amount of sugar permitted each person from three pounds a week to a half a pound each week. This order does not affect the one rationed earlier in regard to extra sugar for canning fruit. It is permissible to use one-half pound of sugar for each pound of fruit in jam or preserves and one three quarters of a pound of sugar per pound of fruit for making jam or jellies.

Beginning next week the Red Cross ladies will meet on Tuesday afternoon instead of Monday.

The great British air raid over Germany Saturday night produced intense satisfaction here. Hitler started something when he bombed England and now will reap a whirlwind. It has taken Britain a long time to get ready to bomb Germany on this vast scale and once they get ready and really started the Germans will have plenty to think about. In the three years it took the Allies three years to get ready and when they began to fight in earnest the Germans soon had to be ready for peace.

Balloon Protection for British Convoys—

British R. A. F. Balloon Command working in balloon ships co-operate with the Royal Navy in escorting shipping round the coast of Britain. This additional guard has proved effective against dive bombing attacks.

RED CROSS DRIVE FOR MONEY TOTALS \$440.25

The recent Red Cross drive in the district for funds resulted in \$440.25 being raised for this worthy cause. Gleichen and district were asked to raise \$500 but fell short of that amount by \$59.75. Considering that many other places fell short of their quota Gleichen did not do so bad. The Blackfoot Indians in a drive of their own donated \$90.00.

FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

A general meeting of the baseball club was held in Ed. Menard's garage shop. It was decided to form a ball team this year and following officers were elected: President R. M. Stabuck; secretary, Roy Gamble; manager H. Dunn. A new diamond was laid out on the other night facing westerly direction. The new diamond will be a great convenience to the spectators for the sun will not shine in their eyes.

Mr. Duncan of Arrowwood had the misfortune to lose his barn and baggage and all its contents by fire. L. Donneworth's residence was destroyed by fire last week. Every available foot of hose was required to reach the burning building and had to be dragged across lots, over fences and in one instance hauled over a stable. The fire started in the attic and all the furniture on the first floor was saved but nothing from the upper floor. It was first reported that one of the children was on the second floor and Mrs. Walsh made several attempts to save him but, was driven off by smoke. The little fellow was finally found in the back lane happily making mud pies.

Mrs. John Lester has been dangerously ill for some days but latest reports is that she is improving. Tenders are being called for the erection of an office building in Gleichen by the Blackfoot Municipality.

Howard Bowen, formerly the popular young and handsome clerk for the Gleichen Mercantile Co., has returned from a three months vacation at the coast, to accept a similar position in the Palm Pipers.

Mr. Jones was a visitor from Husar the other day. "Sherry" is as popular as ever with the Gleichen ladies. Gleichen Oddfellows are quite a high bunch and are keeping interest in a high pitch. Claude Houche has been suffering from rheumatism of late and has been left to consult a specialist. Ralph Umbricht is about on crutches owing to having a small bone broken in his foot, caused by a kick from a horse.

Glen C. House accompanied his brother R. E. to Banff to try the hot springs for rheumatism, from which he has been suffering for sometime. Two business men of Gleichen have decided to close their stores every Wednesday afternoon and continuing through the summer months. Our high school baseball team played at Bassano the other night and won the game by a 7-2 score. An accident happened to Mrs. Frank Hall and Mrs. N. Garst of Arrowwood when returning home, when

near the Arrowwood school the pole became disconnected from the neck yoke and dropped to the ground, which caused the team to run and Mrs. Hall was thrown out first then Mrs. Garst, the latter being dragged some distance and remained unconscious most of the night. Her injuries were a broken arm and hip and many bruises. Mrs. Hall suffered no broken bones, but is bruised badly. Mrs. Hall's two children, who were in the buggy, were not injured.

THE WORLD OF WHEAT

There has been a good deal of talk about "parity" price of wheat. Some friends of this World of Wheat album have asked about parity prices of other farm products. First we must understand that full parity price in Canada and the United States means simply the 1913-14 price of the product multiplied by the increase that has taken place of the things farmers have to buy. This gives the full 1913-14 parity price or full purchasing power of the product.

Then if we divide this full parity into the present price, we shall have the present purchasing power of any product as compared with its similar purchasing power of 1913-14. At today's prices wheat is 43 per cent below its 1913-14 purchasing power or parity and at the new 96 cent price will be 31 per cent below. Hogs are 14 per cent below, butcher steers 10 per cent below and lambs 7 per cent above the similar 1913-14 parity price, but the wages paid to farmers are 44 per cent above the 1913-14 parity.

It will be observed therefore, that while our livestock producers are better off than the wheat growers, all are receiving a much less reward relative to 1913-14 than are workers in industrial plants. Let no one make any mistake about it—our prairie farmers are making a valuable and patriotic contribution to this war.

THE WEEK IN EDMONTON

Buy your winter coal now and save needless suffering later. This is the object of a message issued by Premier Aberhart after he had received a communication from the Federal Coal Administrator. Heavy demands on labor and transportation next fall and winter will make hazardous the mining and delivery of coal, Mr. Aberhart said, and it is imperative that miners be kept working now so as to avert a threatened famine. Declaring that rationing may be necessary, the premier said that it was understood the question of credit advances to consumers was being considered by Ottawa authorities.

Declaring that although "many of our splendid miners have joined the fighting forces or entered war industries" there were others still awaiting the re-opening of Alberta mines Mr. Aberhart said, "If householders will buy their coal now for next winter many of the mines will open up, production will proceed and a crew of 68 fought the fire to a finish, and were engaged in mopping up. (Continued on another page)

Hikers and Riders Invade Eagle's Domain

There are many ways of enjoying the scenic wonders of the Rocky Mountains, but none more intimate or soul-satisfying than following the less-frequented trails and byways, on horseback or on foot, under the friendly guidance of two of Canada's leading alpine societies... the Sky Line Trail Hikers and the Trail Riders of the Canadian Rockies. Both groups have set the date and planned colorful itineraries for their annual outings which this year will cover some of the Rockies' major scenic highlights in the vicinity of Banff, Alta. The Trail Riders will set out from the Springs Hotel, July 24, and enjoy five days in the saddle as well as the joys of camp life on route. Their main camp will be located at Jevly Egypt Lake about half-way on the trail. The Sky Line Trail Hikers, whose members rely on their own legs rather than horse-power, have their annual "safar" scheduled for July 31 to August 3. They too will start out from Banff, and armed with camera and alpenstock, will explore the district around Simpson Pass and nearby Sunshine Valley, where their main camp will be located. Founded by J. Murray Gibson, general publicity agent for the Canadian Pacific railway, both organizations have world-wide

memberships, and continue to enroll new members every year. Each year they take to the trail, the Sky Line Hikers on foot, and the Trail Riders mounted on sure-footed mountain-bred horses. The riders and hikers proceed leisurely, stopping at frequent intervals to fish for trout in the glacial waters of Rocky Mountain streams, "shoot" big game with their cameras, study interesting species of alpine flora, and marvel at the breath-taking panorama. And when day is done, they gather around friendly campfires for hearty meals, sing-songs and later sleep in two-pee in under the stars.

from outside markets."

Outside markets are tending to increase production of Alberta coal. Recent figures issued by the Department of Trade and Industry show that in the first two months of this year the output was 1,476,022 tons, valued at \$4,211,278. This was 25 percent higher than that of the same two months in 1941. Oil production also increased during the period, with 1,695,858 barrels valued at \$2,604,150 showing a 39 per cent increase.

Appointment of O. S. Longman, B.S.A., to the position of Deputy Minister of Agriculture was announced by Hon. D. B. MacMillan. Mr. Longman, formerly field crops commissioner, succeeds J. R. Sweeney, who resigned his position at the minister's request. The new deputy has a long record of agricultural service with the province, and is recognized as an agricultural authority.

While Mr. Hansen, federal conservative leader, was asking in the Commons that the Finance Minister do something to help Alberta pay her contractual obligations, final details of the settlement of the bondholders and government representatives here were being worked out. The total sum involved in the negotiations for refunding is \$12,000,000 approximately, of which \$17,223,550 is held in Britain payable in sterling.

The recent call for women trainees who will be fitted for work in war factories has brought a good response according to J. H. Ross, Alberta supervisor of the youth training plan. A class of 100 is desired, and about 20 women are applying weekly at Edmonton and Calgary, he said. Another phase of the youth training program receiving support is the Home Training Service, which offers free tuition in household economics and management to applicants and assists in finding positions for graduates.

Welcome rains roughed people from fire hazard and gave them a chance to control a forest fire in the Whitecourt area it was stated by T. F. Biegan, provincial director of forestry. A crew of 68 fought the fire to a finish, and were engaged in mopping up. (Continued on another page)

Flax and Coarse Grains Production Needed as a War Measure

Farmers are urged by the Government to produce as much coarse grains and flaxseed as possible.

Coarse grains are required for the production of livestock and dairy products, and flaxseed is urgently needed for its oil content.

THE ALBERTA PACIFIC GRAIN COMPANY, LIMITED (INC.)

Canadian Agriculture

CANADIAN AGRICULTURE is now just as essentially a war industry, and just as vital to our war effort, as is the production of armaments. The old saying that an army travels on its stomach, is no doubt as true today as in the past. The first requisite of the army, navy and air force, both at home and abroad, is that the men and women who compose these services are provided with proper food and sustenance. It is not only our own Canadian forces that must be provided with food from Canada. Vast quantities of farm produce must be shipped, and has been shipped to Britain in order to sustain the population and the fighting forces in the United Kingdom. In the first two years of war Canada has shipped more than three hundred million bushels of wheat and seven million barrels of flour. In the same period Canada shipped more than eight hundred million pounds of bacon and other pork products, one hundred and ninety-five million pounds of cheese, fifteen million dozen eggs, and thirteen million pounds of honey.

Facing The Situation

Canadian farmers, knowing full well the urgency of the situation are going to produce as never before. Here in the West, perhaps unfortunately, it has been found necessary to turn at least to some extent from wheat growing to other crops that appear more essential for the prosecution of the war. A reduction this year of three per cent. in acreage sown to wheat in 1941 is indicated. Western Canada is particularly adapted for the growing of wheat, and this has always been our main crop. However, the necessities of war must now override other considerations, and this year more attention is going to be paid to the growing of fax, barley and other crops. Fax is needed to produce oil for our war industries, and barley will be used for feed for hogs to provide bacon for Britain. In this war it has been truly said that we are all in the front line, and the man on the land is bearing his full share of responsibility. He has been carrying on in the face of many adverse circumstances, and with grit and determination is prepared to do his full share in this fight for the preservation of democracy.

Meeting A Heavy Task

Thus in entering the new crop year of 1942, the Canadian farmer has set himself to the task of producing the essential crops to the limit of his capacity. Farm products will be shipped to Britain in quantities only limited by the carrying capacity of ships and Canada's ability to produce. Given favorable growing conditions and a minimum of the set-backs that plague the life of the farmer, it is expected that the West will be able to contribute largely to the shipments going overseas. It is believed that measures will be taken to ensure sufficient help on the farm. Many farmers' sons have enlisted for overseas service, but regulations have been provided in respect to enlistments to avoid a shortage of men that would seriously affect this important industry. Provision has also been made in respect to the supply of necessary parts to keep farm machinery in repair. And so the farmer puts in the front line, though, not looking back, but with a grim purpose to do his part in no small way in this fight for victory.

Plans for a salvage campaign to retrieve tens of thousands of tons of scrap metal from Canadian farms are presented to Hon. J. T. Thomson, Minister of National War Services, by H. C. Ray, representative of the International Harvester Company of Canada, Limited. The company will use its 3,000 dealers across Canada to help get the scrap into the war effort. A. W. Wright and W. O. Maxwell, company officials, look on.

To Help Win War

Harvester Dealers In Drive For Scrap Iron From Farms

An organized effort to collect all the scrap metal possible from Canadian farms to help meet the critical war production need for scrap at the nation's foundries and factories was announced by Mr. H. C. Ray in charge of advertising and sales promotion for the International Harvester Company of Canada, Limited. The scrap collection campaign will be conducted by International Harvester dealers in their localities and is part of a Dominion-wide drive for scrap from farms by Harvester dealers in 3,000 communities.

The drive, Mr. Ray said, is a contribution to the national salvage campaign and has received official sanction from Honourable J. T. Thomson, Minister of National War Services. The campaign has been undertaken by the Harvester Company in the belief that the strategic location of its farm equipment and motor truck fleet, together with its extensive network of farm trading centres and their acquaintance with farmers provide the shortest cut to farm scrap collection on a large scale.

"The plan calls for the establishment of a list of dealerships of scrap metal from Canadian farms are presented to Hon. J. T. Thomson, Minister of National War Services, by H. C. Ray, representative of the International Harvester Company of Canada, Limited. The company will use its 3,000 dealers across Canada to help get the scrap into the war effort. A. W. Wright and W. O. Maxwell, company officials, look on.

ALL-BRAN REALLY IS DELICIOUS...IT KEEPS US REGULAR...NATURALLY

Says Mrs. George H. Tremblay, Chatham, Quebec: "I have tried to get rid of 'bulk' in my diet. But remember, the cause of constipation that is due to lack of the proper bulk is banished by ALL-BRAN. Yes, the best part of it is that it gives more than just temporary relief."

Why don't you try ALL-BRAN's "Better Way" to correct the cause if you are troubled by constipation. Use a heaping spoonful of 'bulk' in your diet. But remember, the cause of constipation that is due to lack of the proper bulk is banished by ALL-BRAN. Yes, the best part of it is that it gives more than just temporary relief."

Ogden's FINE CUT

OGDEN'S

FINE CUT

OGDEN'S

Located on Big Hill Creek, Cochrane, Alberta, the Ogden Ranch, founded in 1887 immediately following the Red River Rebellion, is still maintained by the fifth generation of the founders. Comprising 10,000 acres of range land, the ranch annually grazes more than 1,000 head of fine beef cattle.

OGYKE RANCH

Another Aid For Pilots

Delicate Instrument Warns Them When Approaching Thunder Clouds

A "cloud charge indicator" has been devised to warn pilots when they approach dangerous thunder clouds. The delicate instrument consists of a neon tube and microammeter, connected to a pointed tungsten rod protruding 14 inches from the plane. Electrical discharges from clouds flash the neon tube and deflect a needle on the meter.

GIFT FROM QUEEN MARY

Queen Mary bought a present for Sir Hugh Elles at a Red Cross sale in Bristol, Eng. He had given an ancient painted Chinese urn which he valued greatly. She bought it and handed it back to him.

The Individual Citizen's Army

A Weekly Column About This And That In The Canadian Army.

By Alan Maurice Irwin

Guerrilla warfare. That's something we hear quite a lot about today. It's good thing to hear about, too. If there had been the same activity by guerrillas in France that there has been in Russia and Yugoslavia the story of the past two years might have been different.

Of course, we have to be careful how we talk about war these days, it is no easy to say the "wrong" thing. Talking about defence, for instance, I'm not a deep enough student of the art of war to know who first said, "the best defence is to attack."

During the lush years that ended in 1929-1930 we were, most of us, too busy making money and "having a good time" to pay any heed to the possibility that we might have to attack a potential enemy before he could attack us.

We were too busy learning new ways to spend our easy money, too busy making necessaries out of luxuries that we didn't need and would have been better without to do anything but applaud, or at the most, misty-eyed politicians who voted to cut down our military expenditures.

We were too anxious to have money to spend to demand that it should be taken from us in taxes to pay for military training. We were too fond of a soft life to join the Canadian militia and keep in touch with the changes that were taking place.

We even changed the name of the Department of Militia to the Department of National Defence—thus perpetuating the thought of defence against aggression in place of the more virile, more Canadian ideal of attack against aggression.

Well, that's all water over the dam now. Let's hope the water never flows the way of gravity and flows back up again.

But this was to be about guerrilla warfare? It is. Guerrilla warfare is attack in the most modern manner. It is attack by small bands under many leaders who use their discretion in the handling of their small units to carry out the general plan of harassing the enemy, damaging important installations, severing and disrupting communications.

The "militarism" we heard so much about during the fight on the Malay Peninsula was guerrilla warfare, much of the fighting going on in China in guerrilla warfare. The good deal of the training of the Canadian Guard in the Old Country is guerrilla warfare.

In Canada the set-up of the Mobile Force in Quebec envisions guerrilla warfare. So does the elastic organization of the British Columbia. There is a strong probability that training of the new Reserve Army will provide plenty of exercise of a guerrilla nature.

We Canadians should be "natural" as guerrillas. We hunt, fish, ski, hike and paddle all over country that is least accessible to formal armies. We are used to the open, have to know how to stalk and take cover if we hunt big game—and many of us were Boy Scouts when we were younger.

It will interest many former Scouts to know that "Scouting for Boys," the "bible" of the Boy Scout movement, is recommended as supplementary reading for today's guerrillas. What has all this to do with the new conception of the individual Citizen's Army—meaning all of us?

Well, we can be guerrillas too. There is a many, a hampering, delaying, disrupting action that we can fight our own homes. Every time we are patriotic enough to observe the spirit rather than the letter of conservation and rationing regulations when we fight a small guerrilla action against the Axis.

Every time we report an infraction of the rationing regulations—even if it goes against the grain—or a case of charging more than the basic price we fight a small but important guerrilla action against the common enemy.

If we are to win—and that means if we are to exist—we've got to save time, money, materials. But we can't do it sitting down, can we?

CONSERVING TIME

A lady, checking over her grocery bill, found this item: "One ton out, 13c ent." Indignant, she called up her grocer and demanded an explanation what he meant by such a charge. "Oh, that's all right, Mrs. Blank," he replied. "That's just an abbreviation for tomato catsup."

HERE'S WHY THE BROWNS CHOSE GYPROC FIREPROOF WALLBOARD

Just look at these pictures Jack. This settles it. We'll use GYPROC!

Here's an actual photo showing how GYPROC prevents the spread of fire. A fire completely destroyed the adjoining room.

Jack, in these pictures the joints don't show.

That's another feature of GYPROC Wallboard—the joints are invisible.

This picture of the living-room in the new home of a well-known Canadian architect shows the perfect walls and ceilings possible with GYPROC.

Shelters in Malta Are Heavily Out of

Natural Rock

Malta is almost solid village. There are 10,000 farms on 90 square miles. Of important assistance to the people in withstanding the non-stop blitz is the marvelous system of shelters. Experts agree they are the world's best.

They are hewn out of natural rock. Their construction started seven years ago during the Ethiopian crisis. There are now shelters for the bulk of Malta's 270,000 people.

Malta's buildings, like the shelters, are made of rock. There is almost no wooden construction. Thus there is no danger of fire from bombs landing burning a great hole as in the city of London. The enemy's only recourse is to drop high explosives, and the thick, tough walls of Malta will stand a lot of pounding.

In the last 21 months, 4,260 homes have been knocked down. But in only a few places do you see damage comparable to London's devastated areas. At night Malta is severely blacked-out—except for the terrible, awning-spraying night of cannonading and giant searchlights.

Many children stay on the street during the semi-alert signalled by a yellow flag which is run up when planes are some distance away. A red flag is run up when the raiders are ready to attack. Maltese children have become quite used to the procedure.

"Mama, bombs!" they shout into the house—and mama leaves off cooking dinner to take the children to the shelter.

Often the children sit at the shelter mouth and watch for the red flag to be lowered. "Bombers gone," they tell mama—and she hurries home to finish cooking.

NEED WATCH DOGS

The British government is calling for more dogs for war service—to guard airfields and factories and to carry messages. It asked dog owners to lend their pets to the government for the duration, expressing particular interest in Alsatians, airdales, collies, terriers, mastiffs and bulldogs "or crosses between them."

About one-tenth of our body weight is made up of blood.

Canadian Press News

New Weekly Paper For Canada's Overseas Troops

As generals and brigadiers waited outside his door, Lt.-Gen. A. G. L. McNaughton took time out at the start of a busy morning of conferences to read "The Canadian Press News" and said the new weekly paper for Canada's overseas troops will fill a long-felt need.

"The Canadian Press News will fill a need that has long been felt by members of the Canadian Army overseas for closer contact with the home land and news of what is going on," Gen. McNaughton said.

"I particularly appreciate the trouble taken to print French-Canadian news in French and we are all very grateful to the CP."

The General was away all week end. His copy, first of 30,000 printed on London presses, was waiting on his desk when he arrived at army headquarters.

Troops at Canadian Army and 1st Corps headquarters were first to receive the paper during the week-end. They read it over one another's shoulders and pronounced an enthusiastic welcome to the four-page tabloid-sized budget of home news.

The bulk of the 30,000 copies, distributed free of charge among the Dominion's fighting men, were delivered.

The first few hundred copies arriving at Army and 1st Corps headquarters were quickly grabbed up, copies going to all ranks, ranging from private to general.

Distribution of the paper extends to the United States. In Britain, where Canadian men are located and even United Kingdom port where Canadian warships berth. In the army it is estimated there will be a copy for every third soldier.

A Timely Tip

How To Manage Quite Well With Less Sugar

For those of you who have been used to rather sweet coffee, E. H. Zmick has the answer on how to meet the new sugar rationing. He's discovered that by first taking a couple of sips of the coffee before any sugar has been added you can get by very nicely by simply adding one teaspoon instead of two or three. And the same applies to foodstuffs such as cereals and fruit. It's the custom that does it, he contends, and once you've grown accustomed to a smaller amount of sugar, the rest is easy.

Leather Stocks

Raw Cattle Hides In Canada Show A Decrease

The Dominion bureau of statistics reported that stocks of raw cattle hides fell by 1,000,000 in February. The total stock at the end of the month was 555,198 hides. It was down from 556,198 at the end of the previous month and 529,387 at the end of March, last year. Calf and kid skins on hand in the Dominion were 75,000 in February, 76,487 at the end of March. Other stocks at the end of March included 18,922 sheep and lamb skins, 159,018 goat and kid skins and 29,890 horse hides.

Including The Fine

Customer Found Out Why Tire Price Was So High

The Wall Street Journal says: There is a story going around of a big tough citizen who deliberately walked into a tire store and bought a new truck tire. For a gag, he was sent to a trucking concern where he repeated his request.

"Burr," he was told, "we'll sell you a new tire. So he was handed one and told the price would be \$10.00. "What?" yelled the belligerent buyer.

"Why, of course," the seller explained. "That's \$30 for the tire and \$10,000 to pay the Federal fine."

For Refugee Children

British Princesses Give Dolls To Be

Ruffed about United States. Child victims of the war recently got attention at the White House and at the British embassy in Washington.

Now that Princess Elizabeth is 16 and officially grown-up, and her sister, Princess Margaret, Rose, is just four years younger, they have apparently decided to give up their dolls.

Five of their dolls—two of them wearing copies of gowns Queen Elizabeth wore on her visit to the United States in 1939—have been given to the British War Relief to be shown in that country, and later raffled off in behalf of aid for European child refugees in Britain.

Plenty Was Learned

Japanese Worked As Barbers In

Cities Of The Orient

Men who have lived in the Orient for years, especially in Ceylon, the Philippines and Shanghai, recall now that the best barbers were Japanese. There seems little doubt they were in the Japanese intelligence service, but they were really fine barbers. With true Oriental patience, many of them operated their shops for years building up excellent local reputations. In Calcutta, a Japanese barbershop was patronized by all the big wigs of the place, and as there is something hypocritical about a barber's ministrations no doubt a good many Sahibs talked freely. Some day, when we are able to get hold of Tokyo records, it may be discovered how much the Japanese learned.—Edmonton Journal.

Mission To Africa

United States To Study Resources For United Nations

The United States is sending a special mission to the Union of South Africa to study development of vast resources for the United Nations' war effort, it was disclosed.

An informed official said the mission, composed of members of an interdepartmental committee, was the forerunner of several ultimately to be sent to neutral and allied nations throughout the world to explore their potentialities in replacing war material cut off by the Axis.

South Africa's selection as the spot for the first explorations was apparently an indication of its growing importance in allied strategy in the Indian Ocean area. It was pointed out that ships carrying munitions from the United States to India, the Middle East and Madagascar could pick up substantial amounts of raw materials on their return to this country.

Specific materials to be developed in each area are considered military information.

Gardening

The advantage of good seed cannot be overemphasized, especially now when time is so precious. Other factors may be beyond control but the gardener has absolute check over his seed. Weather, soil and location may be ideal but without good seed, specially selected to suit Canadian conditions, the gardener is going to be a failure and all the time in planting put into it, largely lost.

Weed Killers. There are now liquid killers on the market to prevent grass or weeds growing in driveways. Care must be taken to prevent these materials away from wanted grass, flowers or shrubbery as they destroy all growth.

Another suitable material for driveways is common salt. The cheaper and more readily available, it will liberally application of this—about one or two handfuls of salt per square foot—destroy grass, weeds, poison ivy, etc. but it will also bind gravel and soil together into an even surface, keep down dust and repel rain.

Garden Freshness

There is no substitute for the really fresh quality of vegetables grown at the door and picked when they reach just the right stage of maturity. Other factors have a major all their own. But there are plenty of people with big gardens that do not enjoy as much of this freshness as they should. With them there are a few more green peas, baby carrots and beets, new potatoes and corn, and that is all. Either the rows are finished or else there is nothing left but over-mature vegetables which should have been eaten days or weeks before.

To develop a steady, long supply of really fresh vegetables, experts advise making at least three sowings of all types, the first a week or so before the regular time, the second at the regular time, and the third a week or ten days later.

There are only 30 stars within a hundred trillion miles of the earth.

SELECTED RECIPES

JELLIED SHANK
1/2 lb beef shank, front quarter
2 lb boiling pork
1 onion, medium size, stuck with 2 whole cloves
1 carrot, medium size, diced
1 tablespoon salt
1 stalk celery, or dry celery leaves
1 teaspoon pepper
1 teaspoon dry mustard
1 tablespoon Crown Brand Corn Syrup

Method: Wipe the meat, place in large kettle and cover with cold water. Heat to boiling point, boil five minutes and remove skum. Reduce heat, add vegetables, seasonings and corn syrup. Simmer gently until tender. Remove meat from bones and pull apart with fork. Strain the stock; add clear stock to meat. Turn into loaf pan 9" x 5" x 3" to set. This meat may be used for sandwiches either sliced or mixed with pickles or finely chopped hard-boiled eggs.

SALAD SANDWICHES
3 cup chopped crisp cabbage
1 cup chopped cauliflower
1 cup chopped cooked ham
2 tablespoons chopped pimiento
1 tablespoon chopped parsley
Salad dressing

Method: Combine all chopped ingredients with sufficient salad dressing to moisten. Use as filling between slices of buttered round or white bread.

Cretonne derives its name from Creton, a village in Normandy where linen was made.

Church bells have been cast in England since 940.

OTTAWA LETTER

By DR. F. W. GERSHAW

The provinces of Canada have given up the income and corporation tax fields to the Dominion. In return for this each province was given either the amount each year of the tax collected in 1940 or an amount that will service the debts of the province less the amount collected in succession duties. Alberta chose to accept each year the amount received in 1940 for income and corporation tax. This arrangement will last for the duration of the war and for one year after that date if it is not terminated before by agreement. The province of Alberta alone secured good income from the gasoline tax. Now, on account of the restrictions on the use of gasoline this revenue will be greatly reduced. The Dominion will make up this loss by a special grant each year. The province will, however, suffer some loss of revenue because, for one thing, some people will not take out car licenses or drivers licenses.

The Dominion will pay the provinces yearly about \$55,000,000. However, the Dominion will collect in income tax, national defence tax and excess profit tax \$47 million more this year than last year. The revenue run from 20 per cent to 92 per cent of the total incomes and will be higher this coming year.

A storm seems to be gathering over the question of conscription for overseas service and there may be great changes in the near future in the political life in Canada.

The winning of the war is the great endeavor at the present time. Industries have stopped the production of civilian goods like automobiles and are turning out two ships and 12 planes and tremendous quantities of war material every week. There are 300,000 Canadian soldiers as well as many air men and sailors on distant shores and on the seven seas. Canadian tanks, guns and ammunition can be found in every field of battle in the world. Agriculture is turning from the production of wheat to the production of much needed butter, cheese, bacon and beef.

With all this, much thought is being given to the post-war establishment and it is the firm determination of the Canadian people that, as far as possible, no one will lose by going to the defense of the democracy, no one will gain by staying at home and there will be no war profits.

Mr. Isley, minister of finance, said: "At no time has money been in the drivers seat as far as Canada's war effort is concerned. Repeatedly in public and in private I have told my colleagues to go ahead and plan our war program on the basis of maximum effort which Canada can physically accomplish and that I would see somehow or other that money for the utmost contribution would be supplied."

(Continued from page one)

THE WEEK IN

Appointment of Alfred Speckman, M.L.A., and leader of the Independent group in the Legislature to the House Committee investigating conditions under the Workmen's Compensation Act is announced. Mr. Speckman succeeds the late D. M. Duggan, M.L.A. Under the chairmanship of Dr. J. L. Robinson, the committee also included J. W. Beaudry, K.C., M.L.A., and Frank Lauder, M.L.A. A call for submissions has been made.

Alberta's speed-up program of teacher training is already underway, and 32 potential high school teachers are being engaged in studies which will permit them to go to small high schools of the province by October 1st. Twenty of the students have already graduated as Bachelors of Arts, and they are eligible for senior high school certificates. The remainder are undergraduates who may take junior certificates.

CANADA NEEDS FLAX AND COARSE GRAINS.

The immediate war need for agriculture is to remedy the deficiency of vegetable oils and fats resulting from the cutting off of our Pacific sources of supply.

Wherever possible, wheat growing land should be diverted to the growing of coarse grains, in particular, oats, barley, flax, corn, hay and alfalfa. Farmers must raise still more hogs, cattle and sheep and boost production of eggs and all dairy products.
